Sorry to be annoying but I finally got feedback on the maps. This latest version is a go! Could you add "Attachment 1" above the title of "Gold King Mine Release Path"? And then we are done. Thank you for your patience. - lw

Thanks Marlen (and John). Could you take another look at the creek and river. Now it looks like there is some kind of criss-cross of streams on the left side of the mine site. Also, the upper arm of the Animas on the right seems to “hook” too much. See attached map I found on the web for a better understanding of what I’m asking for (assuming the attached map is correct). Thank you for your patience on this. - lw

Good Evening Laura,

I am sorry for replying late, I was taking a flight to the West Coast that is why I could not get back to you right away. I did a few changes on the map:

1. Change the order of the layers so that the creek are on top of the Gold King Mine point, thus the fact that the creek and river does not meet is visible
2. Change the symbology of the river and creek slightly to be thinner to enforce the fact that the creek and river does not meet as well

One needs to zoom in to the area a bit to see that the river and creek do not meet, if you want to emphasize more on it, I am thinking we can create an inset of the area.

Just to let you know, I have the day off tomorrow, so I created a map package and sent it to John in case you need changes made right away. I sure will help you but may not be accessible right away in case you need to changes to be done immediately.

Again I am sorry for the delay. Let me know if you have any comments.

Regards,

Marlen

Marlen,

Sorry it's taken a while to get back to you. The one comment received thus far is regarding the release map. On the Cement Creek-Upper Animas portion of the map, the Creek and River seem to make a circle that meets at the mine site location. Could we refine that area so it reflects that they don't actually meet? Otherwise, I'm hopeful that this is the final change but we'll see once HQs gets through with their review. Thanks, lw

Good Morning Laura,

Attached please find the maps you requested with the edits made.

Let me know if you need anything else.

Have a great day.

Regards,

Marlen

David, this is the "site map" that I've asked for Arizona to be added. We should have that tomorrow as well. - lw
